Professional Summary

Java Developer with experience of building scalable Spring Boot applications and RESTful APIs. Strong in database design, API development, and backend architecture. Experienced in delivering end-to-end features across real-world projects. Seeking backend roles focused on scalable systems and clean architecture.

Technical Skills

Languages: Java, SQL, Python, JavaScript
Backend: Spring Boot, Hibernate (JPA), Servlets, JDBC, FastAPI
Frontend: React, HTML5, CSS3, Tailwind CSS, Bootstrap
Databases: MySQL, Firebase
Tools & Platforms: Git, Docker
Core Concepts: OOP, RESTful API, Microservices

Education

Rajarajeswari College of Engineering, Bengaluru
M.Tech - Computer Science and Engineering, CGPA: 8.61 *2026*

Visvesvaraya Technological University (VTU)
B.E. - Information Science and Engineering, CGPA: 6.96 *2022*

Work Experience

Scrupulous Enterprises
Software Engineer *Jul 2022 - Jan 2023*

- Engineered RESTful backend services using **Java and Spring Boot** to improve modularity and reduced code redundancy.
- Integrated APIs with frontend components to streamline data flow and reduce manual processing.
- Optimized internal dashboards using **HTML, CSS, and jQuery** to enhance real-time visibility of business metrics.
- Collaborated on debugging and refactoring efforts to improve application stability and code quality.

PreciseVision Management Consultancy Services Pvt. Ltd.
Assistant - Income Tax Proof Verification (IBM Payroll Project) *Dec 2023 - Dec 2024*

- Audited payroll tax documentation to ensure compliance with statutory regulations.
- Validated structured employee records using **SAP payroll systems** and identified data discrepancies.
- Improved documentation accuracy and record-keeping efficiency by approximately **15%**.

Projects

Online Banking System - Full Stack Web Application (GitHub):

- Architected a secure banking platform with authentication, fund transfers, and transaction tracking.
- Developed backend logic using **Spring Boot, Hibernate, JPA, and MySQL** ensuring transactional integrity.
- Built responsive UI components using **HTML, CSS, Bootstrap, and jQuery**.

AI-Driven Career Growth and Job Assistance Platform (GitHub):

- Created an AI-based career intelligence platform for salary prediction, job matching, and skill-gap analysis.
- Implemented REST APIs using **FastAPI (Python)** for resume parsing and recommendation workflows.
- Applied **NLP and CNN models** for salary estimation with normalized salary bands (L1-L10).
- Designed an explainable similarity scoring engine for resume-job matching.
- Tech Stack: **Python, FastAPI, NLP, CNN, React, PostgreSQL**.

Depression, Anxiety & Overthinking Detection - Machine Learning:

- Designed a biosignal-based classification system for emotion and mental state analysis.
- Applied **speech recognition techniques and CNN models**, achieving approximately **82% accuracy**.
- Focused on feature extraction, model evaluation, and ethical data handling.

Privacy-Aware Proximity Marketing System (GitHub):

- Implemented backend APIs using **FastAPI** to support ML-driven advertisement prediction workflows.
- Developed a **React**-based admin dashboard for campaign management.

- Built a token-based transaction simulator to demonstrate secure and privacy-aware ad exchanges.

QuickBite - Full Stack Food Delivery Progressive Web App (GitHub):
- Developed a mobile-first **Progressive Web App (PWA)** using **HTML5, Tailwind CSS, and JavaScript**.
- Integrated backend services using **Firebase** and **ASP.NET Core Web API** for authentication and order tracking.
- Implemented real-time updates to enhance order visibility and user experience.

Certifications

JP Morgan Software Engineering Job Simulation - Forage

Spring Boot Certification - Scaler

Full Stack Java Developer - JSpiders

Artificial Intelligence and Machine Learning - Internshala
